

## PERSONAL AND COMPACT MINIFLARES

## WesCom Signal and Rescue Germany GmbH

Chemwatch: 66-6774 Version No: 3.1.1.1 Safety Data Sheet

Issue Date: 17/02/2017 Print Date: 21/10/2017 L.GHS.CAN.EN

## **SECTION 1 IDENTIFICATION**

### Product Identifier

rioduct identifier						
Product name	duct name PERSONAL AND COMPACT MINIFLARES					
Synonyms Art. 9194600 Comet Personal Signal Launcher, Art. 9194700 Comet Compact Signal Launcher, Art. 9556650 Pains Wessex Personal Distress S Miniflare MK8, Art. 9556660 Pains Wessex Compact Distress Signals Miniflare MK8						
Proper shipping name	CARTRIDGES, SIGNAL					
Other means of identification	Not Available					

### Recommended use of the chemical and restrictions on use

Relevant identified uses

Use according to manufacturer's directions.

Marine distress signal. Red aerial cartridges. Placing a signal star as an emergency signal using a suitable launcher. The Personal Pack contains 9 and the Compact Signal Launcher 3 red aerial flare cartridges and a penjector firing mechanism, all enclosed in a tough, water-resistant case. The penjector is fitted with a stainless-steel spring and striker pin. It features a slot for easy loading and unloading of the flare cartridge with the trigger in the safety catch position.

### Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party

Registered company name	WesCom Signal and Rescue Germany GmbH
Address	Vieländer Weg 147 Bremerhaven 27574 Germany
Telephone	+49 471 3930
Fax	+49 471 3932 10
Website	www.wescomsignal.com
Email	info@wescomsignal.com

## **Emergency phone number**

Association / Organisation	Consultant Lutz Harder GmbH
Emergency telephone numbers	+49 178 433 7434
Other emergency telephone numbers	Not Available

## **SECTION 2 HAZARD(S) IDENTIFICATION**

## Classification of the substance or mixture

Classification Explosive Division 1.4, Eye Irritation Category 2B

## Label elements

Hazard pictogram(s)

SIGNAL WORD

WARNING

### Hazard statement(s)

(4)					
H204	Fire or projection hazard.				
H320	Causes eye irritation.				

### Hazard(s) not otherwise specified

Not Applicable

## Precautionary statement(s) Prevention

P210	P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.	
P234	Keep only in original packaging.	

Chemwatch: 66-6774 Page 2 of 10

Version No: 3.1.1.1

## PERSONAL AND COMPACT MINIFLARES

Issue Date: 17/02/2017 Print Date: 21/10/2017

P250	Do not subject to grinding/shock/sources of friction.	
P280	Wear protective gloves/protective clothing/eye protection/face protection.	
P240	Ground and bond container and receiving equipment.	

## Precautionary statement(s) Response

P370+P372+P380+P373	case of fire: Explosion risk. Evacuate area. DO NOT fight fire when fire reaches explosives.			
P370+P380+P375	of fire: Evacuate area. Fight fire remotely due to the risk of explosion.			
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.			
P337+P313	If eye irritation persists: Get medical advice/attention.			

## Precautionary statement(s) Storage

P401 Store in accordance with local regulations for explosives.

## Precautionary statement(s) Disposal

P501 Dispose of contents/container in accordance with local regulations.

## **SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS**

### Substances

See section below for composition of Mixtures

## Mixtures

CAS No	%[weight]	Name
		hermetically sealed device contains;
		polytechnic materials of;
7439-95-4	30-60	<u>magnesium</u>
10042-76-9	30-60	strontium nitrate
7757-79-1	1-10	potassium nitrate
7704-34-9.	<1	sulfur
7429-90-5	<1	aluminium

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

## **SECTION 4 FIRST-AID MEASURES**

## Description of first aid measures

Eye Contact	If this product comes in contact with eyes:  • Wash out immediately with water.  • If irritation continues, seek medical attention.  • Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin Contact	If skin contact occurs:  Immediately remove all contaminated clothing, including footwear.  Flush skin and hair with running water (and soap if available).  Seek medical attention in event of irritation.
Inhalation	<ul> <li>If furnes or combustion products are inhaled remove from contaminated area.</li> <li>Lay patient down. Keep warm and rested.</li> <li>Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.</li> <li>Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary.</li> <li>Transport to hospital, or doctor, without delay.</li> </ul>
Ingestion	<ul> <li>Not considered a normal route of entry.</li> <li>If swallowed do NOT induce vomiting.</li> <li>If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.</li> <li>Observe the patient carefully.</li> <li>Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious.</li> <li>Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.</li> <li>Seek medical advice.</li> </ul>

## Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

## **SECTION 5 FIRE-FIGHTING MEASURES**

## **Extinguishing media**

**DANGER**: Deliver media remotely.

- For minor fires: Flooding quantities only.
   For large fires: Do not attempt to extinguish.

Apply by mechanical means only.

Chemwatch: 66-6774 Page 3 of 10

Version No: 3.1.1.1

### Special hazards arising from the substrate or mixture

Fire Incompatibility Avoid contact with other chemicals.

## Special protective equipment and precautions for fire-fighters

### WARNING: EXPLOSIVE MATERIALS / ARTICLES PRESENT!

- Evacuate all personnel and move upwind
- Prevent re-entry
- Alert Fire Brigade and tell them location and nature of hazard.
- May detonate and burning material may be propelled from fire.
- Wear full-body protective clothing with breathing apparatus.
- Prevent, by any means available, spillage and fire effluent from entering drains and water courses.
- Fight fire from safe distances and from protected locations.
- Use flooding quantities of water.
  - ▶ DO NOT approach containers or packages suspected to be hot.
  - Cool any exposed containers not involved in fire from a protected location.
  - Equipment should be thoroughly decontaminated after use.

Slight hazard when exposed to heat, flame and oxidisers.

## Fire/Explosion Hazard

Division 1.4 Substances, mixtures and articles which present no significant hazard: substances, mixtures and articles which present only a small hazard in the event of ignition or initiation. The effects are largely confined to the package and no projection of fragments of appreciable size or range is to be expected. An external fire shall not cause virtually instantaneous explosion of almost the entire contents of the package.

Compatibility Group G explosives are pyrotechnic substances, or article containing a pyrotechnic substances, or article containing both an explosive substance and an illuminating, incendiary, tear- or smoke-producing substance (other than a water-activated article or one containing white phosphorus, phosphides, a pyrophoric substance, a flammable liquid or gel, or hypergolic liquids).

Combustible. Will burn if ignited.

Combustion products include:

carbon monoxide (CO)

carbon dioxide (CO2)

other pyrolysis products typical of burning organic material.

### **SECTION 6 ACCIDENTAL RELEASE MEASURES**

### Personal precautions, protective equipment and emergency procedures

See section 8

### **Environmental precautions**

See section 12

## Methods and material for containment and cleaning up

## WARNING!: EXPLOSIVE

BLAST and/or PROJECTION and/or FIRE HAZARD

- Clean up all spills immediately.
  - Avoid inhalation of the material and avoid contact with eyes and skin.
  - Wear impervious gloves and safety glasses.
- Minor Spills Remove all ignition sources.
  - Use spark-free tools when handling.
  - Sweep into non-sparking containers or barrels and moisten with water.
  - Place spilled material in clean, sealable, labelled container for disposal.
  - ▶ Flush area with large amounts of water.

### WARNING!: EXPLOSIVE

- Clear area of personnel and move upwind.
- Alert Fire Brigade and tell them location and nature of hazard.
- May be violently or explosively reactive.
- Wear full body protective clothing with breathing apparatus.
- Consider evacuation (or protect in place).
- In case of transport accident notify Police, Emergency Authority, Competent Explosives Authority or Manufacturer.
- No smoking, naked lights, heat or ignition sources
- Increase ventilation.
- Use extreme caution to prevent physical shock.
- Use only spark-free shovels and explosion-proof equipment.
- Collect recoverable material and segregate from spilled material.
- ▶ Wash spill area with large quantities of water.

Personal Protective Equipment advice is contained in Section 8 of the SDS.

### **SECTION 7 HANDLING AND STORAGE**

Safe handling

**Major Spills** 

## Precautions for safe handling

- ▶ Handle gently. Use good occupational work practice.
- Observe manufacturer's storage and handling recommendations contained within this SDS.
- Avoid all personal contact, including inhalation
- Avoid smoking, naked lights, heat or ignition sources
- Explosives must not be struck with metal implements.
- Avoid mechanical and thermal shock and friction.
- ▶ Use in a well ventilated area
- Avoid contact with incompatible materials.
- When handling DO NOT eat, drink or smoke

## Conditions for safe storage, including any incompatibilities

Suitable container	<ul> <li>All packaging for Class 1 Goods shall be in accordance with the requirements of the relevant Code for the transport of Dangerous Goods.</li> <li>Class 1 is unique in that the type of packaging used frequently has a very decisive effect on the hazard and therefore on the assignment to a particular division</li> </ul>
Storage incompatibility	<ul> <li>Avoid contact with other explosives, pyrotechnics, solvents, adhesives, paints, cleaners and unauthorized metals, plastics, packing equipment and materials.</li> <li>Avoid contamination with acids, alkalis, reducing agents, amines and phosphorus.</li> <li>Explosion hazard may follow contact with incompatible materials</li> </ul>

## **SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION**

### **Control parameters**

## OCCUPATIONAL EXPOSURE LIMITS (OEL)

### INGREDIENT DATA

### MATERIAL DATA

### **Exposure controls**

Appropriate	engineering

Engineering controls for explosive articles are designed to reduce or eliminate fragmentation and/or blast effects either by suppression of the source of detonation or by protection at the exposed location, or both. Barricades, shields, contained detonation chambers, and "zero quantity-distance (Q-D)" magazines are examples of engineering controls.

Engineering controls are designed and tested in a rigorous fashion. The construction of the engineering control must be carefully duplicated in field applications to assure it will function properly.

It is thus imperative that engineering controls be built exactly in accordance with the design package, and that they be used only for the articles (e.g.munitions) for which they are authorised.

## Personal protection

controls

# Eye and face protection

- ▶ Safety glasses with side shields
- Chemical goggles

## Skin protection

## See Hand protection below

- ▶ Wear chemical protective gloves, e.g. PVC.
- Hands/feet protection
- ► Wear safety footwear or safety gumboots, e.g. Rubber

## **Body protection**

See Other protection below

- ▶ Fire resistant/ heat resistant gloves where practical, otherwise
- ▶ Heavy-duty chemically resistant gloves capable of providing short-term protection against spontaneous ignition.

## Other protection

 Safety footwear Hard hat

|Ear Protection.

Thermal hazards

Not Available

## Respiratory protection

Respiratory protection not normally required due to the physical form of the product.

## **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

## SECTION 10 STABILITY AND REACTIVITY

Reactivity	See section 7
Chemical stability	<ul> <li>Presence of shock and friction</li> <li>Presence of heat source and ignition source</li> <li>Product is considered stable under normal handling conditions.</li> <li>Stable under normal storage conditions.</li> <li>Hazardous polymerization will not occur.</li> <li>Avoid contact with other chemicals.</li> </ul>
Possibility of hazardous reactions	See section 7
Conditions to avoid	See section 7
Incompatible materials	See section 7
Hazardous decomposition products	See section 5

## **SECTION 11 TOXICOLOGICAL INFORMATION**

## Information on toxicological effects

Inhaled	Not normally a hazard due to physical form of product. Inhalation of vapour is more likely at higher than normal temperatures. The vapour is discomforting		
Ingestion	Not normally a hazard due to physical form of product.		
Skin Contact	Not normally a hazard due to physical form of product. The vapour is discomforting		
Eye	Not normally a hazard due to physical form of product. The vapour is discomforting		
Chronic	▶ Generally not applicable.   Principal hazards are related to the explosive/ decomposition by products of the cartridge, if inadvertently discharged or launched without adequate control and safety measures in place. Normal exposure to the article by all route is considered to be practically non-harmful. Over exposure to fumes from firing is harmful.

Legend:	Value obtained from Europe ECHA Registered Substances - Acute toxicity 2.* Value obtained from manufacturer's SDS. Unless otherwise specified data extracted from RTECS - Register of Toxic Effect of chemical Substances		
STRONTIUM NITRATE	Asthma-like symptoms may continue for months or even years after exposure to the material ceases. This may be due to a non-allergenic condition known as reactive airways dysfunction syndrome (RADS) which can occur following exposure to high levels of highly irritating compound. Key criteria for the diagnosis of RADS include the absence of preceding respiratory disease, in a non-atopic individual, with abrupt onset of persistent asthma-like symptoms within minutes to hours of a documented exposure to the irritant. A reversible airflow pattern, on spirometry, with the presence of moderate to severe bronchial hyperreactivity on methacholine challenge testing and the lack of minimal lymphocytic inflammation, without eosinophilia, have also been included in the criteria for diagnosis of RADS. RADS (or asthma) following an irritating inhalation is an infrequent disorder with rates related to the concentration of and duration of exposure to the irritating substance. Industrial bronchitis, on the other hand, is a disorder that occurs as result of exposure due to high concentrations of irritating substance (often particulate in nature) and is completely reversible after exposure ceases. The disorder is characterised by dyspnea, cough and mucus production.		
ALUMINIUM	No significant acute toxicological data identified in literature search.

## **SECTION 13 DISPOSAL CONSIDERATIONS**

### Waste treatment methods

Product / Packaging disposal

- ▶ Explosives must not be thrown away, buried, discarded or placed with garbage.
- Explosives which are surplus, deteriorated or considered unsafe for transport, storage or use shall be destroyed and the statutory authorities shall be notified.
- ► This material may be disposed of by burning or detonation but the operation may only be performed under the control of a person trained in the safe destruction of explosives.

Refer to local Waste Disposal Authority and supplier for suitable disposal procedure.

## **SECTION 16 OTHER INFORMATION**

## Other information

Chemwatch: 66-6774 Page 10 of 10 Issue Date: 17/02/2017 Version No: 3.1.1.1 Print Date: 21/10/2017

PERSONAL AND COMPACT MINIFLARES

Name	CAS No
strontium nitrate	10042-76-9, 13470-05-8
aluminium	7429-90-5. 91728-14-2

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.

### **Definitions and abbreviations**

PC-TWA: Permissible Concentration-Time Weighted Average

PC-STEL: Permissible Concentration-Short Term Exposure Limit

IARC: International Agency for Research on Cancer

ACGIH: American Conference of Governmental Industrial Hygienists

STEL: Short Term Exposure Limit

TEEL: Temporary Emergency Exposure Limit.

IDLH: Immediately Dangerous to Life or Health Concentrations

OSF: Odour Safety Factor

NOAEL: No Observed Adverse Effect Level

LOAEL: Lowest Observed Adverse Effect Level

TLV: Threshold Limit Value LOD: Limit Of Detection

OTV: Odour Threshold Value BCF: BioConcentration Factors

BEI: Biological Exposure Index
